

Surfaces as Soft as Nature™

Features: Seamless · Resilient · Cushioned · Easy to Clean · Anti-Fungal · Anti-Bacterial · Range of Colors Available · Non-Slip · Absorbs Shock · Rubber Base · Hygienic · Self-leveling · National Service Certified Installers · Fatigue Reducing · Sound Absorbing · Thermal Insulating · Permanent!

Applications: Stalls · Pens · Exam Rooms · Aisle Ways · Recovery Stalls · Treatment Areas · Surgery Areas · Laboratories.

Equine System Benefits

Supporting Champions One Soft Step at a Time™

Abacus offers multiple Padenpor™ DLX installations. The differences include durability, thickness, resilience, performance and textures. Abacus will customize your installation to your needs. Padenpor™ DLX includes a basemat varying from 9mm to 38mm. The thicker the basemat, the more shock absorption provided to the horse. Several applications of self-leveling two-part polyurethane are then applied to the basemat, along with a textured finish.

Padenpor™ DLX has a seamless construction ensures ease of maintenance, bacteria and mildew resistance. Safety is provided with a textured surface and excellent slip resistance.

Padenpor™ DLX is installed as flooring, walls and columns where protection is important. Abacus' Padenpor™ DLX can be installed virtually anywhere in your facility.

Range of Resilience

Customize your floors comfort and flexibility to your needs.

How much cushion do you need?

Heavy Traffic, 9+2, up to
Increased Comfort, 33+3

Padenpor™ superior multiple use resilient flooring

Padenpor™ delivers exceptional durability and wear resistance to multipurpose floors. Its flexibility in usage makes it the perfect flooring system for any facility. As well as its resilience, it has uniformity in thickness and density to guarantee a safe and stable platform for consistency in performance.

Product

Padenpor™ DLX is a resilient, seamless textured floor system. For over 25 years it has been widely used in a variety of animal care, equine, veterinary applications and zoos. Padenpor looks good, feels great and provides a sanitary environment like no other surface.

Use

Padenpor™ has been used in surgery suites, operating rooms, recovery areas, foaling stalls, aisle ways, breeding sheds, treatment areas, quarantine areas, laboratories, pharmacies and anywhere where you need a clean, seamless, resilient environment. Padenpor™ DLX is designed for any facility where bio-security, cleanliness, comfort, and safety are of importance.

Cleaning

Padenpor™ is easily cleaned. Floors should be sloped toward drains. Simply pressure wash the surface using your preferred detergent. Regular cleaning will ensure an anti-fungal, anti microbial environment. In conjunction with your well managed bio-security protocols, Padenpor™ will provide the most sanitary environment for animal and care givers alike. University studies have shown Padenpor™ to remain 99.9% bacteria free when cleaned in conjunction with proper bio-security.

Sustainability

Padenpor™ has been installed for over 25 years and remains in daily use in some extremely heavily trafficked areas. If needed, Padenpor™ can be resurfaced. This is significantly cheaper than removal and replacement that other floors require. It can also be resurfaced quicker than if you have to replace a floor. This results in less down time for your facility.
